

# Quick Supply Network Stencil

**Quick Supply Network** is one of eVSM's **Quick Stencils** and is a specialized supply network stencil designed to visualize and play "what-if" games to help improve the cost and lead time aspects of the network. It is designed for broad usage and with minimal training.

Easy

Benefits:

- Easily visualize, communicate and discuss the supply network for a product family and geographic region.
- Input time/cost data for each leg of the network and automatically generate lead time and cost charts.
- Do "what-if" studies with alternate routes for cost and time improvements or to reduce risk.
- Overlay maps onto geographic detail from any source and perhaps including mapping of adverse events like earthquakes or tornadoes.

Fast

The technical concepts addressed by the Quick Supply Network stencil are shown below.

Focused
